- Laser engraving benefits: Imprint does not rub off and no ink contact with liquids or mouth
- Dishwasher safe
- Manufactured with an Antimicrobial additive which fights bacteria growth on the product's surface.
- Neutralizes over 99% of active bacteria on product's surface.
- Additive doesn't wear off and remains effective for the life of the product.
- Reduces odor as additive fights odor - causing bacteria

**FIGHTING BACTERIAL GROWTH ON PRODUCTS
ALL DAY. EVERY DAY!**

Featuring an antimicrobial additive molded in the plastic

MicroHalt™ products each have an EPA registered antimicrobial agent incorporated into the plastic that protects the item itself by suppressing growth of bacteria. The EPA master label for the registered additive states that the antimicrobial agent is approved for inclusion into the polymers from which the products are manufactured for protection of those products themselves. The antimicrobial properties do not protect users or others against bacteria, viruses, germs or other disease organisms. For more information on U.S. regulations on antimicrobial agents and treated products, visit www.epa.gov

All food-contact products have undergone FDA testing and passed 21 CFR 177.1520 & 21 CFR 177.1630. The EPA registered additive has been approved for use in the application of food-contact plastic products.
