**FIGHTING BACTERIAL GROWTH ON PRODUCTS
ALL DAY, EVERY DAY!**

Featuring an antimicrobial additive molded in the plastic

MicroHalt™ products each have an EPA registered antimicrobial agent incorporated into the plastic that protects the item itself by suppressing growth of bacteria. The EPA master label for the registered additive states that the antimicrobial agent is approved for inclusion into the polymers from which the products are manufactured for protection of those products themselves. The antimicrobial properties do not protect users or others against bacteria, viruses, germs or other disease organisms. For more information on U.S. regulations on antimicrobial agents and treated products, visit www.epa.gov
