NEW Purified & Sparkling Water

\$2.09 / Can

Set-up Charge: \$55

Min Qty: **240** cans = **10** cases

80-65312

Adding to our Social Responsibility

Here's the many ways canned water contributes to protecting the environment.

Aluminum is more efficient to recycle than single use plastic due to its high scrap value.

Aluminum is non-toxic & does not leach out any chemicals during the recycling process.

Decorating via labels vs. ink is better for the recycling process.
